List of Required Materials for Steam

Below is a list of all required documents and assets needed to submit your game to Steam. Please note that for the graphical assets, resolutions, file extensions, and sizes ==MUST== be exact. Please read each description carefully, as some have important notes about how the assets are used. At the bottom of this document is a gallery of example assets for a DigiPen game released on Steam.

If you have any questions regarding the requirements, please contact the IP committee via DigiPen webmail services.

Current members:

- Matthew Brunner
- Jeremy Holcomb
- Christopher Onorati

NOTE: If a game contains any assets found online, each must be approved by the IP Committee. Include the license(s) in the required Licenses folder. If your game uses any paid assets, receipts must be provided alongside instructor approval of the expense.

Falsification of information will result in disciplinary action by the campus the game was submitted from.

INPUT REQUIREMENTS

Sticky Keys Input Blocking	If your game uses the Shift key, or supports custom key binding, you must prevent Windows operating systems from detecting key inputs as a trigger for Sticky Keys.

TEXT REQUIREMENTS

Item	Description	File name
Keywords	A list of keywords for your game. List as many as you like.	keywords.txt
Description	150-word (minimum) description of the game, alongside a feature list. The feature list should have 3-5 bullet points regarding content in your game. Note you may not link to other websites, portfolios, etc. in your description.	description.txt
Controller Support	Inform whether the game has no controller support, partial controller support (some things still require a mouse or keyboard to work with like menus, launching the game, etc.), or full controller support (you can launch and operate every element in the game without a mouse and keyboard).	controller.txt
Language Support	Provide a list of all languages your game supports. For each language state if the game supports the language in its interfaces (UI/HUD), Audio (Voice Acting), and Subtitles (note that subtitles only count if ==EVERY== line of dialogue has a subtitle).	languages.txt
Feature Support	Provide a text document listing all features of your game. You may only select from the following features: • Captions • Steam Achievements • Steam Workshop • Steam Cloud • Stats • Steam Leaderboards • Async Game Notifications Built with Source SDK • Developer Commentary	features.txt
Computer Requirements	Provide a text document that lists **BOTH** recommended AND minimum specs for: • Storage Space • CPU • GPU • RAM • Game is 64 bit only yes/no • (optional) Audio Card	specs.txt
Players	Provide a text document providing information on which of the following play modes the game supports (list all that apply) Single-Player Multi-Player Multi-Player Modes (if you have multiplayer modes): -PVP (local, lan, online) -Co-op (local, lan, online)	players.txt

GRAPHICAL REQUIREMENTS

Item	Description	File name
Icon	A 32x32 icon that represents your game. Your icon ==MUST== be this size.	Icon.ico
Header Capsule Image	This image should focus on the branding of your product. For best results, please use the same artwork that you use for any retail box or marketing and make sure the logo is clearly legible. NOTE: This image may not show any in-game UI. NOTE: This image must clearly show your game title (ideally using a standardized logo). This image must be 460x215 in size.	HeaderCapsule_460_215.png
Small Capsule Image	These are small, so they should focus on making the logo clearly legible, even at the smallest size. NOTE: This image may not show any in-game UI. NOTE: This image must support transparency. This image must be 231x87 in size.	SmallCapsule_231_87.png
Main Capsule Image	These should be designed to market the product. For best results, use the key art and logo that is being used for any retail boxes or marketing. Avoid using quotes or other strings of text beyond the title of your game. NOTE: You must leave the bottom right of the image free of any important detail or text per Steam regulations. NOTE: This image may not show any in-game UI. This image must be 616x353 in size.	MainCapsule_616_353.png
Page Background	This should be ambient so as not to compete with the content on the page. Avoid high-contrast images or images with lots of text. A template will automatically be applied to your uploaded file, which will tint it blue and fade out the edges. This image must be 1438x810 in size.	PageBackground_1438_810.png
Screenshots	Must submit at least 5 screenshots. For best results, please provide screenshots in high-res, widescreen format (ideally 1280 x 720 or 1920 x 1080 All images should be screenshots that show your game. This means avoiding using concept art, pre-rendered cinematic stills, or images that contain awards, marketing copy, or written product descriptions. NOTE: The maximum number of screenshots you may show is 10. **NOTE: You may have screenshots taken with a dev cam, but these do not count towards the 5 screenshots that must be taken during normal play**	Screenshot_01-10.png
Library Capsule	This should be graphically-centric and give the user some sense of the experience. Please use the key art and logo that is being used for any retail boxes or marketing. Avoid using quotes or other strings of text beyond the title of your application. The art should immediately tell the customer something important about your product. This image must be 600x900 in size. **Please note you must have your game title in the library capsule per Steam requirements!**	LibraryCapsule_600_900.png

Library Hero	This should be a visually rich image that is easily recognizable. This image may ==NOT== include any game UI or HUD. Your game logo should ==NOT== be displayed on this image.	LibraryHero_3840_1240.png
Library Logo	Ensure the logo is both visible and legible against the hero graphic background. The PNG image should have a transparent background. This appears at the top of a user's library details page for your game, placed on top of the hero graphic.	Library_Logo_640_360.png
Vertical Capsule	A graphic that is 374px wide by 448px tall. This image should display your game title clearly, and not show any HUD/UI.	Vertical_Capsule_374_448.png

VIDEO REQUIREMENTS

Please generate a trailer video. The trailer should be the highest resolution that you have, up to 1920 x 1080 resolution, 30/29.97 or 60/59.94 fps, high bit rate (5,000+ Kbps) and in .mov, .wmv, or .mp4 container files. H.264 video and AAC audio is preferred, but we can transcode from many formats. 16:9 aspect ratio is preferred since the Steam client is optimized for widescreen, but 4:3 aspect ratio is accepted. Please note that audio will be filtered down to regular stereo when we transcode the videos.

Please note:

- Your trailer may not link or advertise other web pages outside of Steam, including games.digipen.edu.
- You may not display game credits at any point in your trailer. If you want to advertise another platform besides Steam, please contact a member of the IP committee to get more detailed information on how to do so.
- Your trailer's runtime must be at least 50% gameplay footage (cutscenes do not count).
